

Job Description

Research and Innovation Officer (Pre-Award)

Salary:	Grade 6
Contract:	Part time, ongoing
Location:	Canterbury
Responsible to:	Senior Research and Innovation Officer (Pre-Award)
Job family:	Administrative, professional and managerial

Job purpose

A member of the Research and Innovation Support (RIS) local delivery team, the Research and Innovation Officer (Pre-Award) helps to stimulate and support the Division's research and innovation culture. Increasing research and innovation income and the number of high-quality outputs is central to the University's strategy; the role holder is responsible for linking the expertise of academic colleagues with suitable funding opportunities and will provide support to maximise grant applications.

The role holder will work in close collaboration with the other teams within the Research and Innovation Support directorate as well as staff within Divisions to ensure compliance with set policies and procedures and relevant regulatory requirements.

The role holder will be assigned to a specific Division but will be expected to work across others as necessary as well as supporting cross-Divisional initiatives such as the University's Institutes.

Key accountabilities

The following are the main accountabilities for the job. Other duties, commensurate with the grading of the job, may also be assigned from time to time.

- Identify research and innovation funding opportunities from a variety of sources (commercial, charity and government funding) from online sources, contacts, and funder events, to increase academic knowledge of alternate sources of funding and drive-up income and societal impact.
- Develop strong, supportive relationships with academic colleagues within the Division(s) to enable the matching of funding opportunities and maximise the impact of the promotion of potential funding opportunities for research and innovation in line with the University's ambitions and KPIs.
- Provide pre-award support with the aim of improving the success rate of applications. This will include the provision of accurate project costings which adhere to university guidelines, advice and guidance to academic colleagues with respect to draft applications and support for the acceptance of research and innovation awards (liaising with other areas of RIS and the wider University as necessary).

- Engage directly with research funders and businesses (commercial and public sector) in a proactive way, to grow the University's external profile and to increase income generation or engagement opportunities.
- Develop an in-depth knowledge of and keep abreast of updates within the assigned Division's areas of expertise (and across the wider University) and options for funding and collaboration, to provide correct and current information to partners and increase engagement.
- Build and maintain key relationships across the University and externally, to ensure the efficient operation of research activity.
- Maintain an awareness of sector developments and share any learnings internally through active participation in a Community of Practice. The postholder will also be expected to provide cover for staff absence and peak workloads of other Research and Innovation Officers (Pre-Award).
- Support the creation of a culture that is highly performance and contribution focused, built on a foundation of equality, diversity, belonging and inclusivity and that inspires people to bring their best every day.

Key challenges and decisions

The following provide an overview of the most challenging or complex parts of the role and the degree of autonomy that exists.

- The role holder plays a key role in supporting the development of improved research & innovation income generation in an extremely challenging economic environment. This will include providing support to increase the quality of applications, so that they have the greatest chance of success with external funders.
- Deals with a range of issues and often unforeseen problems, needing to exercise judgement about referring queries to the next level.
- Deals with sensitive situations and confidential data and information. Need for tact and confidentiality when dealing with the different people involved (PhD students, academic/professional services, external partners) and for interpersonal skills that encourage staff and students to approach the post holder for advice.
- Works on own initiative with minimum supervision for immediate work priorities, planning own workload within agreed quality standards or to a specification. Will be expected to resolve day to day operational difficulties within own team using own judgement and experience.

Facts & figures

N/A
